

“

*Hired Tri-State Waterworks to install a water softener system and reverse osmosis water filter.*

*The sales expert was prompt and easily answered any questions I had about the system and what would be appropriate for my home. He didn't try to up sell me on anything I didn't need and focused on what I specifically asked for.*

*The gentlemen who installed it was on time (arrived 10 minutes early), efficient, and answered all my questions about operation. I highly recommend this company.*

”

## What is Alkaline Water?

Alkalinity refers to the presence of minerals in water. Water always tries to balance itself. With minerals being present, the water will try to give these minerals away to anything it touches. Our reverse osmosis systems include a high quality mineral filter to add back minerals into the water that provide alkalinity (calcium, magnesium, potassium bicarbonate)...

## Reverse Osmosis System

5-Stage Pure Drinking Water Filter – Alkaline Water

## What is a Reverse Osmosis System

Reverse Osmosis Systems are a series of filters. Our systems will remove 99.9% of all impurities from the water. The system will purify the water and sit in a 4 gallon reserve tank until demanded by faucet or refrigerator.

**Unlike Carbon Filters**, reverse osmosis systems are able to remove **INORGANIC** and organic chemicals. Carbon filters (such as your refrigerator) can only remove chlorine and some sediments. Reverse Osmosis water will remove chemicals such as:

- Lead
- Fluoride
- Vinyl Chloride, Sodium Chlorides, etc..
- Forever Chemicals and Trihalomethanes

## Popular Brands that use Reverse Osmosis Systems:

## Why Choose Our Reverse Osmosis System

Our Tri-State Waterworks Reverse Osmosis Systems are 5 stages. We **Assemble** our systems with US manufactured Pentair 60 gpd membranes. These are high quality and ideal for your home. Our systems include a custom colored faucet high quality faucet.

The most important element is our installations. We provide a truly custom installation to ensure its ideal for your home.

- We give you the option to install either under the sink or in the basement rafters (pictured below). This will save your tons of space and protect your system from getting touched needlessly
- We also will tee your system to multiple locations (refrigerator, coffee maker, ice machine, bar area, etc...)

*As a small family owned business, communication is available all day, any day. Rest easy knowing your water is soft and we're always available to support*

## Price Transparency

All of our prices are readily available to view here, online, and in person. We make it easy to compare our products and pricing with our competition. This way you can **KNOW** that you're getting the right products at the best price. All prices **include installation** within 20 feet of plumbing. Any additional plumbing, we will charge time and material. Some installations require drilling through countertops such as granite/quartz/stone. We will provide a subcontractor who charges \$100.

Annual Filter Change:

\$185 (pre-filters + mineral filter) Includes parts and service

## Reverse Osmosis System:

**\$800** (includes installation, all filters, 4 gallon reserve tank and custom colored faucet)

For larger homes, more people, or multiple demand locations, we may recommend a larger tank, membrane, or even a pump
