

“

Since the install, I have noticed a huge difference when taking showers. My clothes feel different too after doing a few loads of laundry. I would highly recommend Tri-State Waterworks. Very friendly, quality work, and a fair price.

”

What is Hard Water?

Hard Water refers to water that contains dissolved minerals such as calcium and magnesium. These minerals present themselves visually in your home in the form of scaling. Faucets, Appliances, dishes, and anything this water touches will be damaged. Skin is no exception. Dry skin is a very common symptom of hard water.

Water Softener

Tri-State Waterworks
Signature System

What is a Water Softener?

A Water Softener will completely remove minerals from hard water. It will produce soft water void of calcium and magnesium. Water Softeners use a resin media. Through an ionic exchange, the media will trade a sodium chloride molecule for a calcium or magnesium molecule. The water softener resin will eventually run out of sodium chloride molecules to trade and will require a "regeneration". This process will send all minerals gathered down the drain and prepare the resin with sodium chloride.

All water softeners use salt. Salt free conditioners do NOT remove minerals and therefore does NOT produce soft water.

Why Choose Our Water Softener

Our Tri-State Waterworks Signature Water Softener contains the highest quality products.

- Fleck Brand Valve
- Clack Brand Tank
- US Manufactured 10% crosslink resin

The most important element of our water softener is that they are fully assembled by Tri-State Waterworks. We choose each part and build the system properly. This ensure our quality is the best in the industry inside and out. Also, by assembling ourselves, the internal components are sealed and put together properly.

As a small family owned business, communication is available all day, any day. Rest easy knowing your water is soft and we're always available to support

Price Transparency

All of our prices are readily available to view here, online, and in person. We make it easy to compare our products and pricing with our competition. This way you can KNOW that you're getting the right products at the best price. All prices **include installation** within 20 feet of plumbing. Any additional plumbing, we will charge time and material. Prices include 250 lbs of solar salt to ensure soft water immediately after installation. Prices include full warranties backed by Tri-State Waterworks.

Tri-State Waterworks Signature Water Softener: \$1,800

Ideal for homes that are 1,000-3,000 square feet with up to 5 people inside.

For larger homes, more people, or heavier water use; add \$200 for increased size.
